Jason Yin

https://www.linkedin.com/in/jason-yin-0a8a9728a/

EDUCATION

North Carolina State University **August 2023 - Present**
Computer Science B.S. GPA: 3.93 *Raleigh, NC*
Activities: Competitive Programming, ACM

PUBLICATIONS

GEM-Style Constraints for PEFT with Dual Gradient Projection in LoRA (co-author)
IEEE International Conference on Data Mining Workshops (ICDMW) 2025, pp. 2736–2743; arXiv:2601.02500

ACHIEVEMENTS

HackNC 2025 (471 participants), General Track 1st Place
2024 International Collegiate Programming Contest, Mid-Atlantic Regional Bronze Medal

WORK EXPERIENCE

Capital One **June 2026 – August 2026**
Business Analyst Intern *McLean, VA*
- Investigated portfolio and pipeline trends across internal CRM and market benchmarking data for a $9B+ commercial deposit portfolio, surfacing a client reclassification opportunity and a revenue-risk exposure, and synthesizing findings into recommendations for leadership.
- Built a Claude-powered natural language SQL assistant with domain-specific context and example queries to enable repeatable self-service analysis for the team.

NC Renewable Ocean Energy Program **August 2025 – May 2026**
Software Engineering Intern *Raleigh, NC*
- Engineered a full stack application combining multi-year geospatial resource datasets with device specifications to identify optimal combinations of offshore technologies for a selected domain.
- Mounted docker volumes for 70GB of data, reducing container build time for 2 hours to 3 minutes.

SLCCE Inc. **Spring 2025 – Present**
CSC Chair *Nonprofit*
- Lead Python and Arduino workshops for 300+ middle and high school students, designing a Python curriculum of 4 workshops and 5 mini-projects in Jupyter notebooks.
- Built browser-only hosting (Google Colab, Pyodide/WebAssembly on GitHub Pages) so workshops run with no installs on locked-down school devices.

University of North Carolina at Greensboro **May 2025 - July 2025**
Research Intern *Greensboro, NC*
- Integrated GEM continual learning methods on GPT-2 using PyTorch, achieving 92% of full fine-tuning accuracy on the Massive Multitask Language Understanding benchmark while reducing projection overhead by 99.97%.

Kadro Solutions **August 2024 - December 2024**
Software Engineering Co-Op *Raleigh, NC*
- Created a two-pointer algorithm to resolve product label desynchronization.

PROJECTS

Interview Arcade | HackNC 2025 **October 2025**
- Developed a full-stack tech interview practice platform using React and FastAPI, integrating the Gemini API for AI-powered code and audio feedback.

TECHNICAL SKILLS

Languages | Python, Java, C++, C, JavaScript, Bash
Frameworks and Tools | React, Node.js, Flask, Spring, REST APIs, WebSockets, Docker, AWS, Azure, Git, Linux
Data and ML | PyTorch, TensorFlow, Hugging Face, Pandas; Snowflake, MySQL, MongoDB
